

## Will your pension run out early?

Impact on people opting for early retirement as a result of the pandemic

An increasing number of people have been forced into early retirement due to the economic impact of the coronavirus (COVID-19), with many worried about how they'll make ends meet in the future. Because of the pandemic, we are currently in a challenging economic period. The global economy has taken over ten years to recover from the shock of the last financial crisis.

In a recent survey, the findings showed that 3% of people in the 55-64<sup>(1)</sup> age group have taken early retirement due to the coronavirus pandemic. And 4% of people in this age group have had to access some of their pension savings to cover living costs because their income has dropped due to redundancy or reduced pay. These percentages may seem small, but they represent hundreds of thousands of people.

### RISKS OF EARLY RETIREMENT

While early retirement may sound like a dream come true, for those without insufficient pension savings it can be a ticking time bomb. Every year of early retirement will have an impact on your pension, in that it represents both a year lost for saving and a year added for spending. Simply put, you'll need to make less money last longer.

Unless you've budgeted carefully and are sure you have enough savings, you could run the risk of your pension running out in your later years. This is an expensive time for many people, due to the cost of financing care, and that can result in unexpected hardship.

### PLANNING FOR EARLY RETIREMENT

If you're planning early retirement, you should consider the following steps:

- Calculate all your savings in different pension pots to find out what your total is.
- Track down any lost pensions from previous employers and add these to your total.
- Check how much of the State Pension you can expect to receive, and from what age.
- Create a budget for your retirement

spending, making sure to include any additional future costs you're aware of and a little extra for future costs you're unaware of. Be honest about how much you'll need.

- Make sure that the total you have in pension savings, when combined with the State Pension you'll receive, is sufficient to cover all your future costs.

### ALTERNATIVES TO EARLY RETIREMENT

If your financial situation is forcing you to withdraw from your pension but you're not ready yet to stop saving, there are ways to access your pension that do not affect your annual allowance and therefore allow you to continue contributing at the same rate in the future.
